Summary

Senior Software Development Engineer with more than **4.3** years developing enterprise Java/Spring Boot microservices, React frontends, and AWS cloud solutions using Docker, Kubernetes, EKS/ECS and EC2, including end-to-end CI/CD pipeline creation, across financial services and e-commerce platforms at **Amazon** and GST India.

Technical Skills

Languages	Java, Python, ReactJS
Frameworks	Spring, Spring Boot, REST APIs, JPA, JWT, OAuth, Hibernate, Spring Security
Cloud Technologies	AWS (Lambda, EC2, ECS, EKS, IAM, VPC, CloudFront)
Developer Tools	Eclipse, IntelliJ, VS Code, Git/Github, Postman
Monitoring/CI/CD Tools	Docker, Jenkins, Kafka
Databases/Caches	PostgreSQL, DynamoDB, MySQL, Redis
AI Agents/Tools	Amazon Kiro, Claude, Copilot, Cursor

Professional Experience

Persistent Systems (*Amazon*) | *Lead Software Engineer*(Java, SpringBoot, ReactJS, AWS, DynamoDB) (Jun 2025-Curr)

- Developed enterprise microservices using **Java 17/21**, **Spring Boot 3.x**, **Kotlin 2.x**, and Hibernate ORM, processing daily transactions across inventory management, order processing, and warehouse systems.
- Implemented serverless functions using Java 17, Python 3.x, and **AWS Lambda** with **DynamoDB** integration, achieving sub-200ms response times for real-time inventory and shipment processing.
- Built responsive web applications using Java **Spring MVC**, **JSP**, **JavaScript**, and RESTful APIs with Tomcat deployment, serving 10K+ concurrent users for Amazon warehousing and commerce platforms.
- Designed data access layers using **Hibernate JPA**, DynamoDB, and **AWS RDS** with connection pooling, implementing CRUD operations for 100k+ records with 99.5% data consistency.
- Configured automated build and deployment pipelines using Maven, **Docker** and AWS services (**EC2**, **ECS**), including container image creation and server deployment with comprehensive testing using JUnit, TestNG, and Jest.
- Accelerated development workflows using **AI tools/agents (Kiro, Claude)** for coding, reviews, and documentation.

Infosys (*GST India*) | *Digital Specialist Engineer - I* (Java, SpringBoot, MySql, REST) (Jun. 2022 - Jun. 2025)

- Developed enterprise-grade REST APIs using **Java 8/11**, **Spring Boot 2.x**, and Hibernate ORM, processing 10K+ daily financial transactions with sub-second response times.
- Implemented **Hibernate JPA** with **MySQL** for banking data persistence, achieving 99.9% data integrity across 500K+ account validation records
- Built **AES-256 encryption/decryption** modules using Java Cryptography Architecture (JCA) for PCI-compliant handling of sensitive PAN and account data.
- Integrated with **NPCI external APIs** using Spring RestTemplate and WebClient, handling 15K+ API calls daily with 95% success rate.
- Migrated **SFTP-based batch processing to REST microservices** using Spring Boot, reducing processing time from 2-3 days to 60 seconds per validation.
- Leveraged **Spring Framework ecosystem** (Spring Security, Spring Data JPA, Spring Web) with Maven build automation and **JUnit** testing, maintaining 95% code coverage.

Education

Odisha University of Technology and Research

Master of Computer Application (MCA), CGPA : 9.38/10

Bhubaneswar, India

2019 - 2022

Certificates / Achievements

- * Qualified for **ACM ICPC** regionals Amritapuri 2020. [Link](#)
- * **5-Star HackerRank** and **3-Star CodeChef** (highest rating of **1629**) Competitive Programmer.
- * Solved **1500+** coding problems across **LeetCode**, **CodeChef**, and **GFG**.
- * Secured **Rank 29 / 2300** in Odisha Joint Entrance Examination (OJEE).

Coding Profiles
